# DIVYESH CHAVDA

AI & Data Science Student | Python | SQL | Machine Learning | Data Analysis

☎ +91 7575837437 • ✉ divyeshchavda707@gmail.com • LinkedIn • GitHub • Morbi, Gujarat

## PROFESSIONAL SUMMARY

AI & Data Science undergraduate student with hands-on experience in Python, SQL, data analysis, machine learning, EDA, and feature engineering. Experienced in developing end-to-end ML projects and interactive dashboards using Scikit-learn and Streamlit. Seeking entry-level opportunities in Data Science, Machine Learning, and Data Analytics.

## EDUCATION

| Degree / Course | Institution | Board / University | Percentage/CGPA | Year |
|---|---|---|---|---|
| **B.E. – AI & Data Science** | GEC Rajkot | GTU | 7.57 CGPA | 2027 |
| H.S.C. | V.C. Technical H.S., Morbi | GSHSEB | 64% | 2023 |
| S.S.C. | Nirmal Vidhyalaya, Morbi | GSEB | 75.83% | 2021 |

## TECHNICAL SKILLS

**Programming:** Python, Object-Oriented Programming

**Data Analysis:** Pandas, NumPy, EDA, Data Cleaning, Feature Engineering

**Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code

**Database:** SQL, MySQL

**Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Model Evaluation

**Data Visualization:** Matplotlib, Seaborn

**Framework:** Streamlit, Flask

## PROJECTS

**Car Price Predictor** | *Python · Pandas · NumPy · Scikit-learn · CatBoost · Flask* **GitHub | Live Demo**

- Developed an end-to-end machine learning system to predict used-car prices using various vehicle relevant features.
- Performed EDA and feature engineering, including brand extraction and car-age calculation, and applied missing-value imputation, One-Hot Encoding, feature scaling, and log transformation of the target variable.
- Trained and compared different ML algorithms and selected CatBoost Regressor based on the highest test $R^2$ score.
- Built a modular prediction pipeline with Flask, integrating the trained model and preprocessing artifacts to provide real-time car price predictions through a web interface.

**Student Performance Indicator** | *Python · Scikit-learn · Pandas · Matplotlib* **GitHub | Live Demo**

- Developed an end-to-end ML regression model to predict student's Mathematics scores using demographic and academic features.
- Implemented data preprocessing, feature engineering, and model evaluation, comparing multiple regression algorithms using $R^2$ score.
- Built a Flask-based web application integrating the trained model and preprocessing pipeline for real-time predictions.

## EXPERIENCE

**Data Science Intern** | **Unified Mentor** *Remote | July 2026 – September 2026*

- Performed data cleaning, preprocessing, and exploratory data analysis using Pandas and NumPy to identify trends and patterns in project datasets.
- Created data visualizations using Matplotlib and Seaborn to communicate analytical findings.
- Developed interactive Streamlit dashboards to present data insights and support data-driven analysis.

## CERTIFICATIONS & TRAINING

- Python Programming Internship Certificate — Oasis Infobyte (AICTE Approved), 2026
